## RC 1

### "Rechargeable battery torch with magnet"

The RC 1 rechargeable battery torch from ANSMANN is both handy and compact. The Krypton lamp with 1.2 W offers plenty of light for normal distances or in rooms. The eco-friendly NiMH rechargeable battery guarantees an operating time of about 2.5 hours. The rechargeable battery torch is very practical for every repair situation. With the aid of the magnet the lamp could be fixed on a metallic housing, so your hands will be free for work. A hand strap is also available. The charging is easily achieved by inserting the torch directly into a Euro main-socket as the EU-plug is integrated within the torch.
